Atlas Corporation

System integration for your success

We express to you all our respect and, taking into consideration the experience, gained by our company, we'd like to propose "Atlas" as a system integrator to accomplish your IT and business tasks.

The system integration is a strategic direction of the "Atlas" activity. We are focused on telecommunication and information systems creation, which promote the development and efficiency growth of our Customers activity.

We achieve it due to the application of high technologies, powerful industrial resources of our Company, professionalism and experience of our specialists.

We highly esteem our Partners and Customers, we appreciate our Competitors, due to you we can be effective, innovative, the best.

We are always opened to cooperation and ready to the most difficult tasks solution, which you will set for us.

Sergey V. Matveev,
the President of the "Atlas" Corporation

Yuriy A. Handros
the General Director of the "Atlas" Corporation

Atlas Corporation Overview

"Atlas" – the leading Ukrainian system integrator

Founded in 1990, the "Atlas" company (www.atlas.ua) represents today a group of firms and branch enterprises, taking a leading place among the system integrators in the field of telecommunication and information technologies in the market of Ukraine.

The "Atlas" activity is directed on development and project application in the field of networks and systems creation for corporate and common use, which integrate processes of data transmission, voice, video images, on solution of full spectrum of accompanying problems, and also on integration, development and adaptation of program systems to the customer requirements.

The company successfully realized hundreds of projects for state and commercial structures of Ukraine, including a significant amount of National value projects. Joint-Stock Company "Atlas" has experience of the complex projects

realization, which integrate the latest developments of high-tech world market, including development and coordination of design documentation, equipment delivery and installation, training of the customer experts, the further support of realized solutions.

The projects, realized not only in Ukraine, but also in the CIS and other countries, prove the professional level of the company. "Atlas" has many professional awards and decorations, that confirm its recognition, both in the market of Ukraine and at the international level.

During the projects realization the company provides the customers with special credit programs of the projects financing. The solutions offered by the company are always directed on flexible adaptation to modernization and development with the purpose of protecting the customer investments in created systems.

Mission

We create the telecommunication and information systems, promoting development and growth of our customers' activity efficiency, due to application of high technologies, professionalism and experience of our specialists.

Principles

The client-oriented company

We exist for our clients. Our activity is directed on providing our Customers with the solutions based on modern information technologies. Our profit is a consequence of high quality of our solutions, a product of mutually advantageous cooperation.

Multi-vendor

A task of the "Atlas" company as a system integrator – to choose from the variety of information technologies and to offer the customer the optimal one just for his task solution. We realize the strategy of multi-vendor to except the dependence from one products and solutions producer, the direct contacts with world leading producers – this is the strategy of the "Atlas" company.

The team method

Unity and professionalism of our team – a pledge of the company success. Each employee is an important and Integral part of common business, each project is a result of joint creative process.

Complexity

During the projects realization we use a complex method to accomplish the business-tasks of our customers. Consulting realization, development, integration and application of design solutions of the company allow to reduce the project expenses and to offer customers the most effective solution.

Quality

High quality of our company products and solutions – one of the "Atlas" characteristics, an incontestable axiom of corporate policy. Work of everyone specialist, and work of the company in general must be of the highest quality standards.

Innovation and constant development

New information technologies are our trade. Our innovation consists in constant development, new solutions searching, problem-solving procedure perfection, specialists professional level increasing.

History of the company

12.11.1990

Creation of the JSC "Atlas" — one of the first private commercial structures in Ukraine with 100% Ukrainian capital.

1990–1994. Formation

Formation of telecommunication projects realization and telecommunication equipment deliveries directions. Establishment of partner relations with world known leaders of telecommunications market (Motorola, Northern Telecom, Ericsson and others), own experts training, preparation of technical base. Realization of first telecommunication projects.

1995–1997. The system integration in the field of telecommunications

The company takes the system integrator position in the field of telecommunication solutions for large communication operators and corporate clients. Realization of first large projects — main fibre-optical line ITUR for Public Corporation "Ukrtelecom", departmental telephone system for National bank of Ukraine and others. Establishment of partner relations with such companies as Cisco Systems, Alcatel, Siemens, Reichle&DeMassari (R&M) and others. Expansion of services spectrum, provided by the company in the field of telecommunications. Creation of design department of technical and service centers of realization. Creation of a branch company "Center of bank information technologies" (CEBIT).

1998. Integration in the market of complex information systems

Software development and systems integration market entry, creation of the program systems department. Creation of the first educational center in Ukraine, certificated by company Nortel*. Among the largest complex projects, started at this time, it is necessary to note the projects for the Pension Fund of Ukraine, the enterprise "Kievgaz", Ministry of Extreme Situations, Accounting chamber of Ukraine and many others.

1999 – 2000. Qualitative and quantitative growth of the system integration projects

Growth of work extents for large communication operators ("Ukrtelecom", Kyivstar, UMC), qualitative and quantitative growth of projects for National bank of Ukraine, the Pension fund of Ukraine. Work on one of the largest projects — telecommunication infrastructure for the building of the Cabinet Ministers of Ukraine. The Company Nortel recognized this work as a project of the year, and Atlas has been declared as a Partner of the year 2000.

Active work with the State Tax Administration of Ukraine in the field of telecommunications and creation of the automatic electronic document circulation system has begun.

Establishment of partner relations with the leading producers of software — Microsoft, Oracle, SCO.

2001–2002. Complex projects of system integration

Alongside with work as system integrator, searching and deployment of activities in new areas continue. Licenses of the special telecommunication systems and the information protection Department of the Security Service of Ukraine have been received; the projects in the field of complex systems of information protection for state and commercial structures have been started.

The given direction enables to offer customers complete service complex provided by the company. Atlas has begun the work on projects of the building complex safety providing, where the company experience in the field of telecommunications and development of applied software has been used. Corresponding projects (on KSZI and systems of access restriction) for Secretary of the Cabinet Ministers, the Ministry of Finance and the Ministry of Economics have been started. In general, the complexity of the projects realized by Atlas increases. Corporate networks for the Lvov Bank Institute and the internal revenue service in Dnepropetrovsk, system of departmental telephony and computer networks for the Sumy Bank Academy have been created. Applying the operational experience in the Pension Fund of Ukraine, Atlas has won the international tender to create the Systems for personified account payments, the National Cash Department of social insurance, Republic Moldova. The amount of works for communication operators continues to increase. Partner relations with Lucent Technologies Company are established. It stimulated preparation and start of the projects, connected to city telephone switchboards and construction of transport SDH-systems in various cities and areas of Ukraine. Thus the work on the main SDH-projects, directed on the Ukraine primary communication network development continue. Alongside with the own business developing, the process of affiliated companies creation goes on. These companies are engaged in adjacent directions (operating, outsourcing, certification of products and projects, etc.). Besides the partner network has been created in regions. The partner companies promote the Atlas decisions and conjointly participate in complex projects realization.

2003–2004.

Gaining positions in the market of complex information projects, the following directions of the company activity have been created: "Integrated systems of management /ERP/ Management Consulting", "Systems of enterprise electronic document circulation". New directions have been opened: consulting and ERP-systems; control and management of buildings and enterprises infrastructure.

Partner relationships with the net.com — well-known company in the field of telecommunications have been established, that expands a spectrum of solutions offered by Atlas. Work with industrial enterprises becomes more active. Applying billing systems in companies "Odessagas" and "Dnepropetrovskgaz" has been completed. Atlas has won the tender and became the general contractor on creation of the integrated complex information system for Pension fund of Ukraine. The first turns of basic subsystems IKIS are put into operation. Great extent of works on first-order creation of Special information-telecommunication system for public authorities (under the order of the Cabinet Ministers) has been accomplished. Due to the essential increase of the company, the process of its reorganization and application of the control systems in different directions of the Atlas activity has been started. With the purpose to optimize the internal business processes, the "Atlas" Corporation has been created, headed by JSC "Atlas". It included the companies that work in the information technologies market. The daughter companies "Anti-virus laboratory CEBIT" and "SoftKey-Ukraine", which formed the "Atlas" corporation, have been created.

Licenses

The company activity is based on the special state licenses:

the State Committee on Communication and Informatization of Ukraine:

- for construction of communication networks with mobile objects

System Integration

Activities and Decisions

Telecommunication infrastructure, networks and systems of communication (connection)

- Structured cabling systems
- LAN, WAN
- Corporate telephony, IP-telephony
- Public telephony
- Call-centers
- SDH networks, data transition systems
- Network management systems

Software Systems

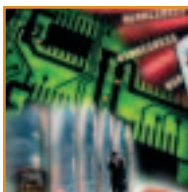

- Operational systems
- Databases and data warehouses
- Application servers, WEB-servers
- Office packages
- Backup and reserve copying systems
- Monitoring and management of information systems
- Data processing and report generation systems
- SCADA systems

Systems of automation of business operation

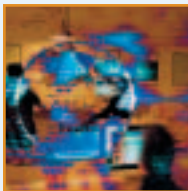

- ERP systems
- Financial planning, budgeting and controlling
- Human resource management
- Customer relationship management
- Billing systems
- Electronic document and content management
- Information and analytical systems
- Geographical information systems

Complex Security Systems

- Complex Information Security systems:
 - Non-authorized access control
 - Cryptographic protection of information
 - Anti-virus protection
 - Security audit for information system
 - Technical means for information protection
- Integrated Object Security systems:
 - Access control for people and transport, Parking management
 - Video survey systems

Building Engineering Systems

- Security systems
- Energy supply systems
- Natural and artificial lighting systems
- Energy effective heating, air conditioning and ventilation systems
- Intelligent control systems

Facility Management

- Dispatch and control systems
- Building life cycle management
- "Intelligent building"

Services

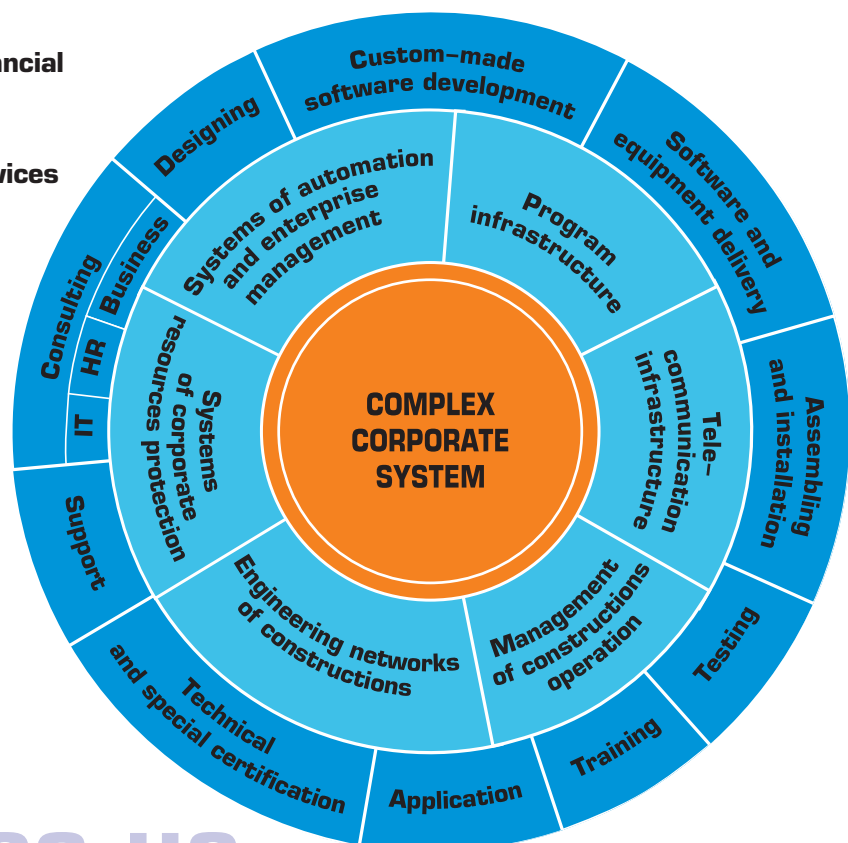

- **Consulting**
 - Business consulting
 - IT-consulting
 - HR-consulting
- **Design and development of technical solutions**
- **Custom-made software development**
- **Hardware and software delivery**
- **Mounting, installation, starting-up and adjustment works**
- **Testing of systems**
- **Training**
- **Technical support**
- **Warranty and post-warranty services**

Additional kinds of activity

- **Media — activity, organization of seminars and conferences**
- **Providing special technical certification processes**
 - Certification in UkrSEPRO system
 - Products and systems expertise on technical and cryptographic protection of information

Vertical Markets

- **State authorities and organizations**
- **Telecommunications**
- **Fuel and energy complex**
- **Building construction and real estate**
- **Industry**
- **Banks and financial institutions**
- **Transport**
- **Trade and services**
- **Insurance**
- **Education**

Products

Products and technologies of our Partners

We support partnership relations with leading world manufacturers and use their products and technologies in our projects:

Telecommunications: data, SDH, voice

	Authorized partner.
	Distributor, Strategic partner.
	System integrator.
	Accredited business partner.
	Partner in Installation.
	Distributor.
	Distributor.
	Distributor, System integrator.
	Reseller and service partner.

Telecommunications: SCS (structured cabling systems)

	Primary partner.
	Certified installer.

Software

	Authorized partner.
	Certified partner.
	Authorized partner.
	Authorized partner.
	Authorized partner.
	Strategic business partner.
	Authorized reseller.
	Business partner.

Anti-virus software

	Authorized distributor.
	Software partner.
	Distributor.
	Distributor, OEM Distributor.
	Distributor, OEM Distributor.

Own products development

Marketing, development, promotion, and supporting of own software products is one of the Atlas business priorities.

Atlas Sibil

- Billing system, geographic information system, metering and regime monitoring system for public service providers.
- Branch solutions for gas-, power-, heat- and water supply companies.
- Including subsystem of payment with legal and physical person (population).
- Integration to ERP systems.

Atlas Billing

- Billing system for automatic telephone stations from Nortel Networks or Siemens. Provides registration of phone calls, bills generation and report generation for corporate automatic telephone stations.

Atlas Doc

- Electronic document flow management system. Provides documents input, support of business processes, control of executive discipline, support of electronic archives. Includes modules for batch document scanning and recognizing, context searching based on ABBYY's technologies.

Atlas HMR

- Human Resources Management – powerful system for personnel and human resources management.

Atlas Tools

- Software development tools based on Microsoft Windows platform for rapid application development and maintenance of information system.
 - Atlas Tools.Development Suite
 - Atlas Tools.Replication Manager
 - Atlas Tools.Software Distribution System

Atlas FM

- Facility Management – automated building management system that provides full life cycle including design, creation, operation:
 - Atlas FM.BAS – building automation system
 - Atlas FM.Parking – parking business management
 - Atlas FM.Barrier – access control system for people and transport.

Atlas IIM

- Industry Information Management – integration and management of the primary industrial information from different sources and its delivery to the business applications level.

Customers

Among several hundreds Corporation projects it is essential to emphasize the following:

Government Authorities

- Administration of the President of Ukraine.
- The Parliament of Ukraine.
- The Cabinet Ministers of Ukraine.
- A range of the Ministries of Ukraine, including: the Ministry of Foreign Affairs, the Ministry of Finance, the Ministry of Economics and the European Integration, the Ministry of Internal Affairs, the Ministry of Extreme Situations.
- The Kiev City State Administration and others...

State sector

- The Central and Regional Institutions of the State Tax Administration of Ukraine.
- The Pension fund of Ukraine.
- The National Security and Defense Committee of Ukraine.
- The Clearing house of Ukraine.
- National cash department of social insurance (Republic Moldova) and others...

Embassies

- Foreign Embassies in Ukraine.
- Embassies of Ukraine abroad.

Fuel and energy complex

- JSC Kievgaz. ■ JSC Odessagaz. ■ JSC Dnepropetrovskgaz.
- JSC Kievenergo/Municipal Accounting Centre and others...
